

New Features

Effective August 10th, 2021, the following products are updated:

Dealer Admin	Version 2.67.0
Virtual Keypad (iOS)	Version 6.39.0
Virtual Keypad (Android)	Version 6.39.0

App Integration: Hanwha Wisenet WAVE

This third-party integration enables your customers to use Hanwha Wisenet WAVE Video Management Software through the Virtual Keypad app.

Before a customer can connect to their WAVE account in Virtual Keypad, you must enable this integration in Dealer Admin. To enable and connect Wisenet WAVE, complete the following steps.

Step 1: Enable Hanwha WAVE in Dealer Admin

To enable **Third Party Integrations** in Dealer Admin, technicians must have a role or permission that allows them to edit systems. For more information, refer to the Dealer Admin help articles in [Personnel Roles](#).

1. Sign in to Dealer Admin.
2. Go to **Customers**.
3. Select the system name.
4. At the top of **System Information**, press **Edit**.
5. In **Third Party Integrations**, select **Hanwha WAVE**.
6. Press **Save**.

Step 2: Connect to a Hanwha WAVE Account in Virtual Keypad

After the integration is enabled, walk the customer through the following steps to connect their WAVE account:

1. Open the Virtual Keypad mobile app.
2. Select the system and enter your user code.
3. Tap ☰ Menu and go to **Video**.
4. Tap ✎ Edit, then tap **Connect Hanwha WAVE**.
5. Enter your Wisenet WAVE credentials and tap **Log In**.

Once a Wisenet WAVE account is connected, your customers can manage their Hanwha cameras from the Virtual Keypad app.

Obtaining the New Software

Updates for Virtual Keypad are available for download, free of charge, from the Google Play™ store and the App Store®.
