

FEATURE UPDATE | APRIL 2023

New Features

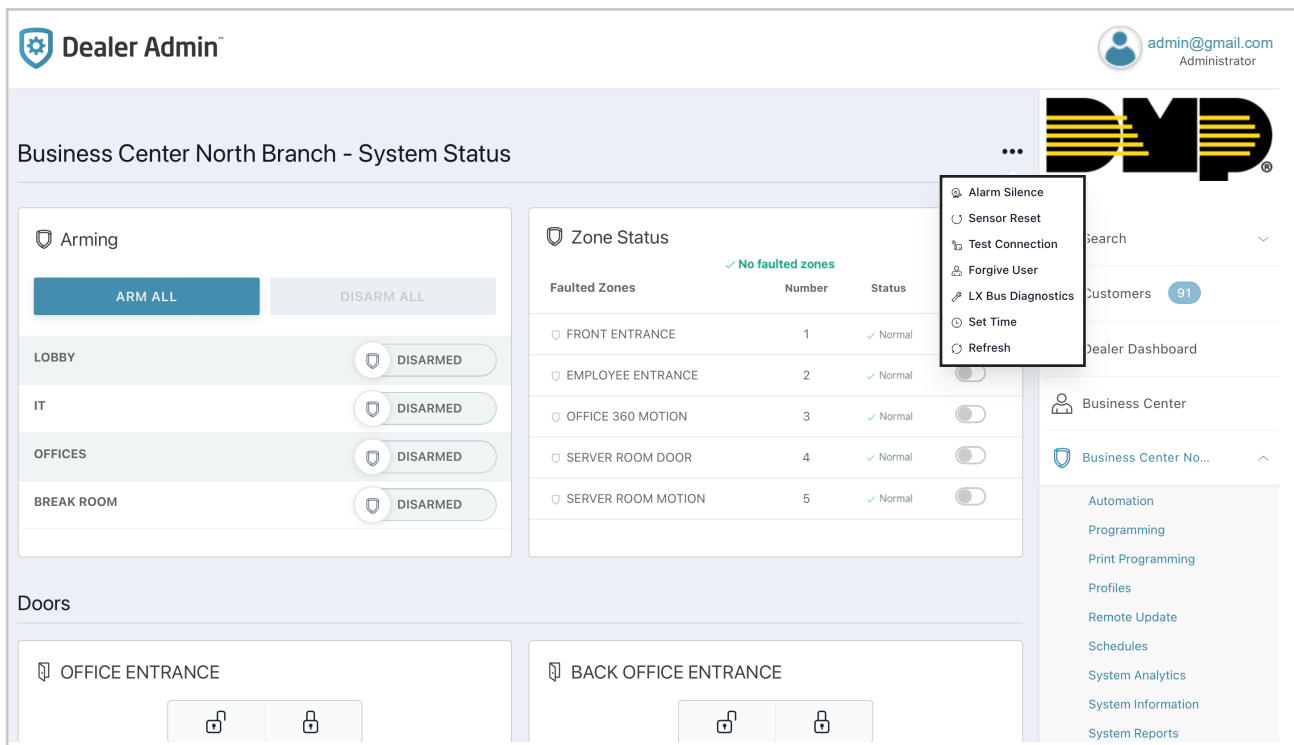

Effective April 11, 2023, Dealer Admin is updated to Version 2.82.0.

Added Features to System Status

For additional ease-of-use, the following options have been added to the System Status page More  icon:

- Alarm Silence
- Sensor Reset
- Test Connection
- LX Bus Diagnostics
- Forgive User
- Lockdown

These options allow the operator to remain on one screen while performing a variety of tasks. See the screenshot below.

The screenshot displays the Dealer Admin interface for 'Business Center North Branch - System Status'. The top navigation bar includes the Dealer Admin logo, a user profile for 'admin@gmail.com Administrator', and the DMP logo. The main content area is divided into several sections:

- Arming:** Features 'ARM ALL' and 'DISARM ALL' buttons. Below are status indicators for LOBBY, IT, OFFICES, and BREAK ROOM, all showing 'DISARMED'.
- Zone Status:** Displays 'No faulted zones' with a green checkmark. A table lists faulted zones with columns for Name, Number, Status, and a toggle switch. The table shows 5 zones, all with 'Normal' status and disabled toggles.
- Doors:** Shows 'OFFICE ENTRANCE' and 'BACK OFFICE ENTRANCE' with lock/unlock buttons.
- Right Sidebar:** Contains a search bar, a 'Customers' count of 91, and a 'Dealer Dashboard' link. Below is a 'Business Center' section with a list of links: Automation, Programming, Print Programming, Profiles, Remote Update, Schedules, System Analytics, System Information, and System Reports.

A dropdown menu is open from the 'More' icon (three dots) next to the DMP logo, listing the following actions: Alarm Silence, Sensor Reset, Test Connection, Forgive User, LX Bus Diagnostics, Set Time, and Refresh.
